Structured Cabling Solutions:

We provide a full range of structured cabling installation, fiber cable maintenance, and network troubleshooting and fault callout services. Our cabling systems are professionally installed, terminated, tested and commissioned to all the relevant industry standards, so our clients are assured of a fast reliable cabling system. We recommend and supply structured cabling products from leading industry manufacturers to ensure all solutions provided meet the required connection speeds and fault tolerance levels required. A full consultancy and structured cabling design service is provided to ensure cabling projects run seamlessly from conceptual design to fully commissioned integrated functional networks.

Our structured cabling installations include:

Requirements & Systems Analysis

Cat 5e Cabling Systems (UTP/FTP/STP)

Cat 6 Cabling Systems (UTP/STP)

Multimode Fiber Optic Cabling Systems

Single Mode Fiber Optic Cabling Systems

Fiber Distribution Frames and Cabinets

Every project is overseen by a supervisor who will ensure that the installation is carried out as designed and is completed on time ensuring that vital changes are tracked and documented along the way thus adhering to the highest industry standards.

Enterprise Network Solutions:

Enterprise Networks provide the industry's most comprehensive and holistic portfolio of products, software and services to empower organizations to reduce capital and operational expenses, improve visibility of key operational data and enable sustainable, energy efficient enterprises. Data network provides communication background to all other network services. Data Network structures today include LAN, WAN, the Internet, intranets, extranets and value added networks demands on correct network design, increase with increasing demand for safety, access management, and adding new services like IP Telephony and Video-Conferencing. When designing a network, the structure of the organization and the company processes, and approaches individual components, so that together they provide maximum service availability at optimal operation cost with adequate security level. Design, deploy and upgrade networks of any bandwidth that meets your needs today, tomorrow and in the future. Good network design must recognize the requirements for business and technical goals, including availability, resilience, scalability, affordability, security, and manageability. Whether you are looking to build a LAN/WAN, re-design your current LAN/WAN, or are considering ways to optimize your current LAN/WAN infrastructure.

Network Security Solutions:

As organizations depend more and more on technology to drive their day to day activities, security, confidentiality and privacy concerns as well as regulatory compliance are issues that need immediate action. Information is vital and constitutes an important asset for any company; we will provide you with the specialist assistance that you need to implement security solutions that will enable you to protect your company data and information assets from attack from hackers, and malicious code, and mitigate the threat of leakage of confidential information.

Our Services:

Software Development:

We develop software applications for:

Windows, Linux/Unix, Mac OS, iOS, Android OS.

We utilize the following development tools:

- HTML5, CSS3, Flash, Java applets, JavaScript, Silverlight, AJAX, jQuery, jQuery UI, jQuery Mobile, Google Maps API;

- PHP, Perl, JSP, ASP, POP3, IMAP, XML, JSON, SOAP, REST, Apache, IIS;

- C++, C#, .NET Framework, Java, Assembler, Xcode, Python, Ruby, NetBeans, PhoneGap/Apache Cordova, Eclipse;

- Wordpress, Joomla, OpenCart, Django, Symfony.

Databases:

Oracle, MS SQL Server, MySQL, Firebird, PostgreSQL, SQLite

Savvy Techmart Limited

When your activity is specific and the standard software solutions cannot fulfill your requirements, you need specially developed for you software. Being our client you will receive exactly the needed software.

We are elaborating on contemporary software products for business management on the bases of the technology "Client / Server" and "Internet / Intranet" solutions conforming to the leading world standards in the field of information technologies.

Our objective is to create fast and reliable applications for short terms, satisfying the needs and the requirements of the clients. We achieve this through long-term experience and team work in the process of designing, developing and testing the software.

Our efforts are oriented towards the creation of qualitative solutions which can be used easily and intuitively by experts in different spheres and not only by IT specialists. The technologies, being implemented by us for the development of software secure flexibility and possibilities for future development of the applications.

We develop software solutions in the following areas:

E-Commerce

Warehouse systems

HRM

Information systems

ERP

B2B & B2C

Financial systems

CRM

Mobile applications

We are developing web based applications, using Internet and the related thereby technologies, allowing safe work at a distantly located working place with data from the corporative network.

We offer complex information solutions situated in the global network and / or in your internal corporative network, built-up of dynamic data bases which are visible from all points in the World, at the same time being fully protected with the most up-to-date coding algorithms, permitting different levels of access to the system of the authorized users. In this way you can increase the efficiency of the exchange of information between the departments in your organization, you can run the warehouse availabilities through internet, you can implement online payments and reservations, order systems and many others.

We develop specific solutions using the newest technologies in the mobile communications.

Savvy Techmart Limited

We develop web applications:

We develop web applications in the following areas:

- **CMS (Content Management Systems)**
- **Mobile applications**
- **Information systems**
- **Warehouse systems**
- **E-commerce solutions**

Web site is the place for complete on line presentation of your business. It is the means for communication with the present and the future clients of each company, it is an important part of the company identity and it is the first source of information to which your future clients have access. A professionally prepared web site distinguishes the company from its competitors, thus giving her an advantage.

We are elaborating on wide range of Internet solutions functioning in favor of your business and of your successful manifestations on the market - from a small presentation site up to an internet shop with information for a large number of goods, orders, payments in real time, etc.

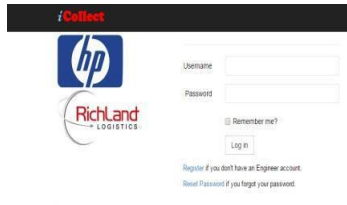

We are engaged in thorough planning, professional developing and managing of web sites as well as with everything related to these engagements - hosting, advertisement presentation, updating, optimization of searching machines and maintenance.

We are working on the outer appearance and the contents of your site, all the way to the moment when you feel absolutely pleased with our work. The end result is a site, corresponding to the image of your company and attracting the attention, which it deserves.

Savvy Techmart Limited

Thanks to the rich experience of our team, we provide Training on IT enabled Services and as well as support our clients in their correct choice of information technologies, pleasing the specific requirements of the clients, being it a hardware or a software platform, a complete infrastructure or separate elements from it.

The experience, which we have accumulated, gives us the opportunity to analyze the problem and to develop the most suitable solution with regards to efficiency, price and maintenance. Our team is constantly being trained as our objective is to keep up in pace with the new technologies.

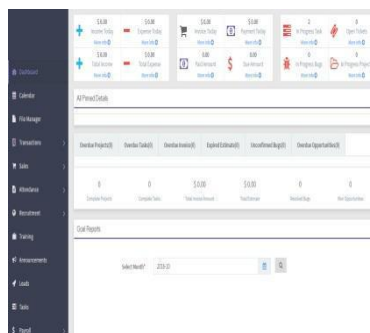

iCollect is a web based Account Receivable Collections module that is directly integrated with the Epi Core Back Office System. It allows the collections department to track collection activities and other customer correspondence.

The report portal application is to give senior management a complete picture of the progress made by the organization. Most of the reports are graphical which give a user quick look at the different progress indicators.

The application was developed in a team environment on multi-tier architecture in .NET technology with the ability to communicate with users as well as applications.

Web based warehouse and information system of managing the warehouse economy, which gives the possibility of following the goods, suppliers, clients, incomes, expenditures, and funds in an unlimited number of warehouses. The system works through a browser, which gives the possibility to work either in a local network or as a distant work with it through Internet by the relevant certificates of safety. It is suitable when working with remote sites (shops), which are not connected to a local network.

POSSIBILITIES:

- Income / expenditure of goods and services in various currencies;
- Initial supply of goods, suppliers, clients and fund by a certain date;

- Discounts;
- Funds in various currencies;
- Transferring of among warehouses;
- Shops supplying;
- Giving back goods to suppliers;
- Exchange of goods by clients and suppliers;
- Claims to goods to suppliers;
- Rejection of goods;
- Consignment;
- Keeping delivery price, retail price and wholesale price;
- Keeping an unlimited number of currencies;
- Keeping retail sale and wholesale shops;
- Stock-taking of goods in the warehouses according to different criteria;
- Checkup according to different criteria: Availability; Income; Expenditure; Flow of goods; The most sold goods, The most solvent clients, Suppliers, Goods of no flow, Change of prices etc.;
- Printing of all warehouse and cash documents

Savvy Techmart Limited

Savvy School Management is a powerful school management system that is designed with the.

Aim to manage the school records with ease. The responsible layout allows you to use in desktop as well as tablet and mobile. It can be run offline or online. It covers maximum modules that can a school have. The reports can be customized, printed.

It can be operated in different levels. Various types of user can access it. The master user has the permission to set permission for other user. Master user can also track record of their user.

Complete HRM Management, Complete Payroll Management, Automatic Database Backup, Daily Attendance Auto Update, Create Salary Template monthly and Hourly, Employee Clock Attendance, Attendance Report

ERP solutions for Garments Factories:

In this project we are designing and developing various software modules for garment factories including material, resources and garments production managements.

ERP solutions for Feed Mill:

In this project we are designing and develop various software modules for any type of production related company.

Simple Photo Retouch

Complex Image Retouch

Super Complex Photo Retouch

Vector Conversion & Illustration Service:

To retain the quality of the photos, vectors are used to make images print ready. Vector images preserves the quality of the image and ensure it does not get affected no matter how much you adjust the size. Adobe Photoshop or Illustrator can be used to raster files and get vectors. Sadly, this is not an easy thing to do because you have to determine which parts should be captured and the edges must be perfect. The quality of your main image will also affect how it would look like when it is resized.
