## Company Overview

OLIVINE LIMITED opened its journey with a mission to use Information and Communication Technology (ICT) as a mainstream of communication and automate the regular business processes. It then extended the services thereby using Internet technologies to enable the fastest, easiest, and most enjoyable software experiences possible. While our customer base and product offerings have grown considerably since our early days, we still maintain our founding commitment to customer satisfaction and the delivery of the most desirable ICT experiences. Today, OLIVINE LIMITED is the place that offers anything you want to automate for your business or individual purposes.

OLIVINE LIMITED is a most resourceful Bangladeshi Information and Communication Technologies (ICT) services and training provider. We operate internationally through our head offices and branch offices. We design, develop, support and promote ICT software applications using integrated.

### Company Background and Establishment

OLIVINE LIMITED is a ICT based company that has been successfully present on the offshore software development market for over three years and since that time has grown to become a well-regarded player in this industry and has proven to be a reliable, efficient and trustworthy service provider to businesses from all over the World.

The OLIVINE LIMITED was established recognizing the potential of the increasing market of the companies that are or would be looking to make their business processes more efficient by automating them using advanced software solutions and/or acting in response to the current market forces that dictate the necessity of online presence to stay abreast of competition.

Since the time it was founded in 2011, the company has been involved in releasing numerous projects for diverse business spheres ranging from basic websites to highly sophisticated business automation systems. Our proficiency in a wide range of modern computer technologies ensures that the solutions we develop perfectly suit our clients' needs. Besides, our trainees get world-class experience and are leading in the market with a very positive impression.

### Company’s Portfolio of Services

The company has been pioneering in many areas in IT solutions in Bangladesh including web development, customize software, software packaging with e-learning solution, e-Governance solution, document archiving and document management, content development, etc.

### Test environment readiness with equipped devices at Olivine Limited

#### Key areas in our Test Environment:

1. System and applications
2. Test data
3. Database server
4. Front end running environment.
5. Client operating system
6. Browser
7. Hardware inclusive of Server Operating system
8. Network
9. Documentation required like reference documents/configuration guides/installation guides/ user manuals.

#### Items in our Test Environment

SI	Item Type	Item Detail	Unit	Remarks
1		iOS Devices	9	iPhone, iPad, iWatch
		Android Devices	11	Phone, Tablet, Smartwatch
		Windows OS machine	20	

	Hardware	Mac OS machine	3	
		Test Application Server	2	For Testing Java and PHP based applications with or without mail servers
		National Data Center (BCC) Test server access	1	Accessible with the help of a2i for testing existing software
		Test Database Server	1	
2.	Software	Bug reporting Software	1	
		Test data management	1	
		Necessary software		
3.	Network	Internet	2	
		LAN and WiFi	1	
		Private network	1	

### Connectivity and Cloud Data Management

Our internet connection in our different offices has given below:

SL	ISP	Location	Bandwidth	Type of Service
1	Intercloud	Bashundhora Office	10 MBPS	Dedicated
		Mirpur DoHS	100 MBPS	Dedicated
2	ICC	Mirpur DoHS	3 MBPS	Dedicated
3	BTCL	Mirpur DoHS	10 MBPS	Dedicated

### OL Network Operation and Infrastructure Monitoring

Continuous up time of business-critical services and availability of optimal performance is ensured by OL-NOC which includes the critical activities mentioned below:

- Monitor network, servers, and applications for health and performance
- Analyze bandwidth and proactively identify bottlenecks
- Continuously monitor and Analyze security threats and attacks
- Modify network configurations per business needs
- Pickup faults and troubleshooting quickly to reduce the meantime to repair

### OL-NOC Operation

OL (Olivine Limited) is directly connected and serves four Data Centers among which two are National Data Center (NDC) and BTCL Billing Production Data center, BTRC's NAID Production Data Center. Work scopes among these Data Centers are:

- Monitoring Networks, Servers and Application Availability
- Health Check of all Servers, Application and Network equipment.
- Manage and monitor all VM's.

- Monitoring and analyzing security threats and attacks
- Update Network configuration as per business needs.
- Find out the faults and troubleshoot it at earliest possible time.

#### OL-NOC Management Policy

- Incidents are detected as soon as possible and properly reported.
- Incidents are handled by appropriate authorized personnel with 'skilled' backup as required.
- Incidents are properly recorded and documented.
- All evidence is gathered, recorded and maintained in the OL-NOC Incident Reporting form that will withstand internal and external scrutiny.
- The full extent and implications relating to an incident are understood.
- Incidents are dealt with in a timely manner and service(s) restored as soon as possible.
- Similar incidents will not recur.
- Any weaknesses in procedures or policies are identified and addressed.
- All incidents shall be analyzed and reported to the designated officer(s).
- Learning from the incidents are recorded from all IT supported locations.
- All environments subject to the OL-NOC Policy determined by the OL Information Security Team and Management.

#### Process of OL-NOC

There are three level NOC teams comprising experienced engineers in charge of monitoring infrastructure health, security and capacity of an environment

- Level-1 team are responsible for monitoring the availability and reachability of all applications and Gateway
- Level 2 team are responsible for monitoring, providing and managing all OL surveillance systems
- Level 3 team of OL-NOC are responsible for monitoring all VMs, ECS, Cloud Infrastructure, Databases, Physical and Virtual Infrastructures, Source Codes of all stages of any projects.

Network Operation & infrastructure Monitoring Diagram

## Management Team

A management team is a group of individuals within an organization responsible for overseeing and directing business activities towards its goals. It consists of top-level executives, middle managers, functional managers, team leaders, advisory roles, and cross-functional teams. Top-level executives make strategic decisions, middle managers implement strategies, functional managers oversee specific functions, team leaders provide guidance, and advisory roles offer support. Cross-functional teams consist of individuals from different departments or functions

working on specific projects. Effective communication, collaboration, and leadership skills are essential for the management team to work cohesively and drive the organization forward. The management team plays a critical role in guiding the organization, allocating resources, making strategic decisions, managing risk, and achieving its objectives.

### **Nayema Akter Sonia**

#### **Chairman**

Nayema Akter Sonia is a chairman of Olivine Limited. She has completed Diploma in Business Administration at Southern cross university, Australia. After completing her academic life, she has started her service life as a chairman at Olivine Ltd. As a Board chair she has strong collaboration, interpersonal, communication, organization, leadership, fundraising, and business acumen skills to effectively work with professionals and build a strong corporate leadership team. They must possess empathy, active listening, integrity, conflict resolution, persuasion, dependability, responsibility, and patience. Effective communication, organization, and time management are crucial for leading board meetings, preparing contracts, and writing memos. She also has extensive leadership experience, strong ties with lenders and investors, and knowledge of their businesses' financial requirements.

## **Corporate Governance**

Olivine Limited is committed to good corporate governance, adhering to Bangladesh's best practices and regulations. Their philosophy includes distinguishing between personal convenience and corporate resources, transparent communication, compliance with laws, a simple corporate structure, transparency, and a trusteeship model. They implement guidelines and review their current status and regulatory requirements. The current governance plans are shared below:

**Independent Director in the Board**

The company plans to incorporate independent directors into its board, amending its articles of association and reconstructing the board as per regulatory authorities' suggestions.

**Management Control System within the organization**

Management is actively promoting the implementation of various control mechanisms in daily operations to ensure smooth organization functioning.

**Legal Compliances with company's act, tax and VAT law**

The company prioritizes legal compliances for effective management control and has encouraged employees to receive proper training on their working matters to ensure compliance.

**Expenses Control**

The company has established a cost review committee, led by a management member, to periodically oversee expenses and evaluate if they can be rationalized considering operational quality.

**Customer Relationship**

Olivine Limited has developed a custom-made CRM system to address customer needs, capturing interaction data based on customer experience.

**Project Management**

Olivine Limited employs a certified project manager-led team to ensure successful project delivery by adhering to basic project management rules.

**Server Management**

Olivine Limited teams manage hardware, software, security, and backups of servers, minimizing downtimes, building secure environments, and ensuring servers meet organizational needs as they evolve.

**Billing management**

Olivine Limited has created Portal, a dashboard for monitoring data and making decisions. It records invoices, ensures timely revenue billing, and tracks project management workflows, including billing milestones, and tax documentation.

**Documentation Control Management**

The company has introduced a document management system, categorizing uploaded documents for future reference and granting access based on their role.

**Support Quality Management**

The company uses a survey form to gather customer feedback on support quality, which is reviewed regularly by the customer service team and analyzed for service quality improvement on the service delivery platform.

**Data Security Management**

Olivine Limited employs a dedicated data security team, managed by multi-team human resources, to protect organizational and client data, reducing risks through regular workshops and following VAPT guidelines.

#### **Code Of Conduct**

Olivine Ltd. upholds high corporate standards, ensuring clear understanding of principles for management and employees across the group.

#### **Business Ethical Conduct and fair dealing**

Management and employees must uphold the Company's reputation for integrity and fairness in business transactions, dealing honestly and evenhandedly with customers, suppliers, and other stakeholders.

#### **Working Environment**

The company is dedicated to ensuring a clean, healthy, and safe working environment for its employees, requiring them to take reasonable precautions to prevent injury.

#### **Equal Opportunity Employer**

Employment decisions, such as recruitment, promotion, transfers, layoffs, discipline, compensation, and benefits, are based on qualifications, performance record, and necessary work abilities.

#### **Gift and Entertainment**

Employees must maintain ethical business relationships with customers, suppliers, and other stakeholders to prevent the appearance of personal advantage in their independent judgments.

#### **Protecting Company Assets**

Employees are responsible for the proper use, protection, and maintenance of company assets, including intellectual property, to achieve the company's business objectives.

#### **Corporate Social Responsibility**

Olivine Limited prioritizes accessibility for all citizens through its services, demonstrating innovative social responsibility as the company grows.
