COMPANY OVERVIEW

With 10 Years of experience in IT industry CloudCoder Limited became the leading Outsourcing service provider in Bangladesh. Our ultimate goal is to assist organizations to expand their operational effectiveness, reduce cost and expenditure and find greater opportunities. Therefore, guide them towards generating more revenues and profits. CloudCoder Limited has been in the industry since 2010 and has successfully worked with many reputed organizations, assisting them to build their brand and business.

ABOUT US

CloudCoder Limited is one of the leading offshore service provider company in Bangladesh. Based on Corporate demand we tailor our services for your offshore needs for ultimate customer satisfaction. Though we haven't aged very well in this competitive market, we are humble and eager to learn from others. CloudCoder Limited provides its offshore service to the customers in the best performance through the company's relationship and access to International aggregators and other companies. During the past four years, we have worked in various software technologies with many great nations like The Philippines, South Africa and The Middle East. However, not only just software, CloudCoder Limited has established more than 65 individual corporate websites for various companies from countries like Singapore, Malaysia, Indonesia, Nepal, South Africa, Canada, Hong Kong and UK. After a successful research we have decided to open a branch in South Africa and the great nation of U.S.A. to serve their market and fulfill their demand, and we are confident enough that we will succeed just like we did in Bangladesh.

OUR VALUES

INTEGRITY

It is our core value that guides all our actions and decisions.

CUSTOMER EXPERIENCE

We thrive to deliver excellence to our customers in every way possible.

TEAMWORK

We value each and every member of our team and we believe that with pure dedication and team spirit, we can take on any challenge.

INNOVATION

It is our number one value on which we thrive to build our success and future goals.

MISSION

CloudCoder Limited is driven to be a significant and dynamic market leader for hiring employees on both onshore and offshore sectors. We create the most ethical, innovative, proactive, and progressive company culture.

WHY CHOOSE US ?

DISTINGUISHED REFERENCES

Our outstanding record in top offshore position in all the industries because we work with dedication, armed with years of experience and extensive know-how, allows us to offer, not just services, but customized comprehensive offshore solutions that suits your company's current and future needs

FOSTERING RELATIONSHIPS

We understand that business relations are the foundation of success, and that's why our priority is to build strong, lasting relationships with our customers. We see our clients business as ours, and we work continuously on bettering and fostering global partnerships, to be able to provide the optimum know-how and support to our customers

KNOW - HOW

Our team mates and executives are our strongest asset. Over the years we have built a team of highly qualified and experienced, and regionally recognized offshore support staff, that provides 24/7/365 support to our customers. And we did not just stop there! In line with our goal to spread our knowledge, and build a base of highly qualified professionals, we are planning to establish a training center for the training and qualification for skills that will provide learners with theoretical and practical experience, and enrich the scene of offshore service in every region.

NOT SOLUTION BUT SERVICE

We understand that business relations are the foundation of success, and that is why our priority is to build strong, lasting relationships with our customers. We see our client business as ours, and we work extensively on bettering and fostering global partnerships, to be able to provide the optimum know-how and support to our customers.

ADVANCED SECURITY INTELLECTUAL PROPERTY

Our extensive work across many fields has enabled us to build a massive use case library that covers a vast array of problems. This has familiarized us, and prepared us with our clients to almost all types of potential hazard

OUR EXPERTISE

OUR SERVICES

In today's fast-moving markets, companies no longer just want a service provider who responds to requests at a minimal cost – they also need an innovative partner that can quickly turn ideas and projects into value enervators with minimal cash burn, and that is what we do. We are a single provider for managing and securing mission-critical offshore services. We range from providing managed services to software solutions and applications for your business.

IT OUTSOURCING

We offer comprehensive IT solutions ranging from Java development to custom.

IT OUTSOURCING

IT outsourcing is the use of external service providers to effectively deliver IT-enabled business process, application service and infrastructure solutions for business outcomes. Outsourcing, which also includes utility services, software as a service and cloud-enabled outsourcing, helps clients to develop the right sourcing strategies and vision, select the right IT service providers, structure the best possible contracts, and govern deals for sustainable win-win relationships with external providers. Outsourcing can enable enterprises to reduce costs, accelerate time to market, and take advantage of external expertise, assets and/or intellectual property.

CLOUD INFRASTRUCTURE

**Our Cloud infrastructures are well versed with
the current market trend.**

CLOUD INFRASTRUCTURE

Cloud computing is the on-demand availability of computer system resources, especially data storage and computing power, without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet. Cloud computing is an application-based software infrastructure that stores data on remote servers, which can be accessed through the internet. Cloud computing service providers usually maintain multiple copies of the data to mitigate instances of security threats, data loss, data breach, etc.

MACHINE LEARNING

Machine learning is an application of artificial intelligence (AI) that provides systems the ability to automatically learn and improve from experience without being explicitly programmed.

MACHINE LEARNING

Artificial intelligence (AI) is a wide-ranging branch of computer science concerned with building smart machines capable of performing tasks that typically require human intelligence. AI is an interdisciplinary science with multiple approaches, but advancements in machine learning and deep learning are creating a paradigm shift in virtually every sector of the tech industry. When most people hear the term artificial intelligence, the first thing they usually think of is robots. That's because big-budget films and novels weave stories about human-like machines that wreak havoc on Earth. But nothing could be further from the truth. Machine learning is an application of artificial intelligence (AI) that provides systems the ability to automatically learn and improve from experience without being explicitly programmed. Machine learning focuses on the development of computer programs that can access data and use it to learn for themselves.

MOBILE APPS DEVELOPMENT

Get custom applications for all the operating systems.

MOBILE APPS DEVELOPMENT

Get custom applications for all major operating systems.

Streamline Your App Development – Get one team that can handle it all, where you pay for the equivalent of one employee – here you get the developer, designer and tester, all working for you at different stages of the app creation in one compact team. This reduces your launch time by as much as 25-35%! In most other mobile app development companies in Bangladesh, resources like the developer, UX designer, backend developer and tester, each give their own timelines for app development. This leads to increased duration and delays. However, at CloudCoder Limited, the developers and designers along with testers work as a single unit to achieve faster results.

IT TECHNICAL SUPPORT

**Get dedicated IT support from Oracle, Microsoft and Cisco
Certified IT support engineers.**

IT TECHNICAL SUPPORT

CloudCoder remote technical support engineers monitor and maintain networks and computer systems of an organization, diagnose software and hardware issues, and provide Technical Support and advice. Almost all organizations depend on computer systems in different areas of operations and stand to lose out on productivity, efficiency, timelines, profits, and even effective risk management due to downtime and poorly maintained IT systems.

WHAT IS OUTSOURCING

Outsourcing is the business practice of hiring a support or service from outside a company to perform services and create goods that traditionally were performed in-house by the company's own employees and staff. Outsourcing is a practice usually undertaken by companies as a cost-cutting measure. As such, it can affect a wide range of jobs, ranging from customer support to manufacturing to the back office.

CASE STUDY

Outsourcing industry has come a long way since its humble beginning back in 2008 after 53% growth it is now at a stage where it is now one of the country's largest emerging industries. IT-ITeS industry in Bangladesh is currently worth 1.1 billion and is expected to reach 4.8 billion by 2025. The key behind the growth of Bangladesh's outsourcing industry is its ability to operate at a very low cost which is around 20-30 % lower than India and Philippines. Besides that large work force and a technology service which has been growing rapidly is also one of the core reason why Outsourcing industry is doing so well currently. Bangladesh current and forecasted market size CAGR shows how big the industry is going to become as we move forward.

2017

USD
\$ 0.9 to 1.1
BILLION

2020

USD
\$ 2.3 to 2.5
BILLION

BENEFITS OF OUTSOURCING

Companies use outsourcing to cut labor costs, including salaries for its personnel, overhead, equipment, and technology. Outsourcing is also used by companies to dial down and focus on the core aspects of the business, spinning off the less critical operations to outside organizations. Outsourcing internationally can help companies benefit from the differences in labor and production costs among countries. Price dispersion in another country may entice a business to relocate some or all of its operations to the cheaper country in order to increase profitability and stay competitive within an industry. Many large corporations have eliminated their entire in-house customer service call centers, outsourcing that function to third-party outfits located in lower-cost locations.
