# COMPANY OVERVIEW

---

ARISENT is a leading System Integration and communications services company, unique for the depth of our capabilities and the dedication of our people. ARISENT helps organizations get more performance and productivity by offering world class enterprise solutions in various sectors.

ARISENT has chosen a strategic global model to deliver premium quality services and products to our clients at affordable cost. By giving companies from a broad range of industries the ability to rapidly deploy a secure collaborative environment for their value chain that eliminates the barriers caused by geographically dispersed organizations and multiple disparate systems, we enable them to dramatically accelerate time-to-market and significantly reduce costs.

ARISENT works with customers from all industries and provides systems and services that are relevant to companies from the largest enterprises and telecommunication carriers down to smaller enterprises.

## VALUES

---

## KEY STRENGTHS

Creating value for our customers is how we differentiate our business from our competition. It is all about assisting customers in achieving their business goals through quality performance, superior solutions and responsive services.

Technology is the tool that ARISENT utilizes to leverage in order to develop a viable and cost-effective solution which is more efficient, elegant and sustainable. We create exceptional competencies in all business-critical technologies of current or future interest to our customers.

Skill is our key asset and we are constantly working towards the enhancement and development of our staff by harnessing their full potential. Our Human Resource Capital will become our source of competitive advantage.

# OUR CUSTOMER VALUE PROPOSITION

Our customers often first choose ARISENT because we simply offered the best solution to their business requirements. They continue to work with us for our on-going ability to support their business.

To ensure total customers' satisfaction, ARISENT constantly searches for solutions that would meet our customers' requirement. We know, it is easy to source for a product for on-sale to a customer but the full value of the product can not be realized until there is deep understanding of it's capabilities. This support requires an investment in training, processes and inventory. It also requires the expertise that results from supporting a solution in multi-facet environments over a period of time.

We partner with the world's best technology partners to provide the most advanced and flexible solutions. Being very selective about our technology partners, ARISENT is committed to deliver solutions that are built on customer expectations.

We may not always choose the strongest brand, however we will always choose a partner with the strongest technology and a commitment to support our regional customers.

Today, ARISENT partners with over multiple world-class technology providers and we constantly review the market for new solutions that would benefit our customers.

## SERVICE PORTFOLIO

### IT CONSULTING SERVICE

ARISENT has very strong expertise in designing solution that just wont boost your business productivity but will also ensure that your organization is embracing world class IT standards. With consultants having decades of consultation experience, you are assured to have the best and cost effective solution for your company.

### INTEGRATION ENGINEERING

Clients have demands involving integration of existing solutions with newer solutions or porting legacy solutions to more up-to-date technologies. The flexibility of our staff in being able to work with various emergent technologies allows us to provide consulting as well as implementation services for such clients.

### TESTING AND QA SERVICES

We are highly skilled in providing services such as designing and executing test plans for various software products. This goes hand in hand with the Integration Engineering needs of clients not willing to spend valuable time and resources to maintaining or updating their products.

### PRODUCT CUSTOMIZATION & DISTRIBUTION

ARISENT customizes and distributes industry specific world renowned software brands covering almost every sector. Our highly capable and well-skilled developers and Tech-support team are working round the clock to meet your exact need. They are constantly utilizing the latest technologies and adapting to the ever-changing IT landscape.
