DETAILED INFORMATION REGARDING THE BUSINESS ACTIVITIES OF THE ORGANIZATION

About Us:
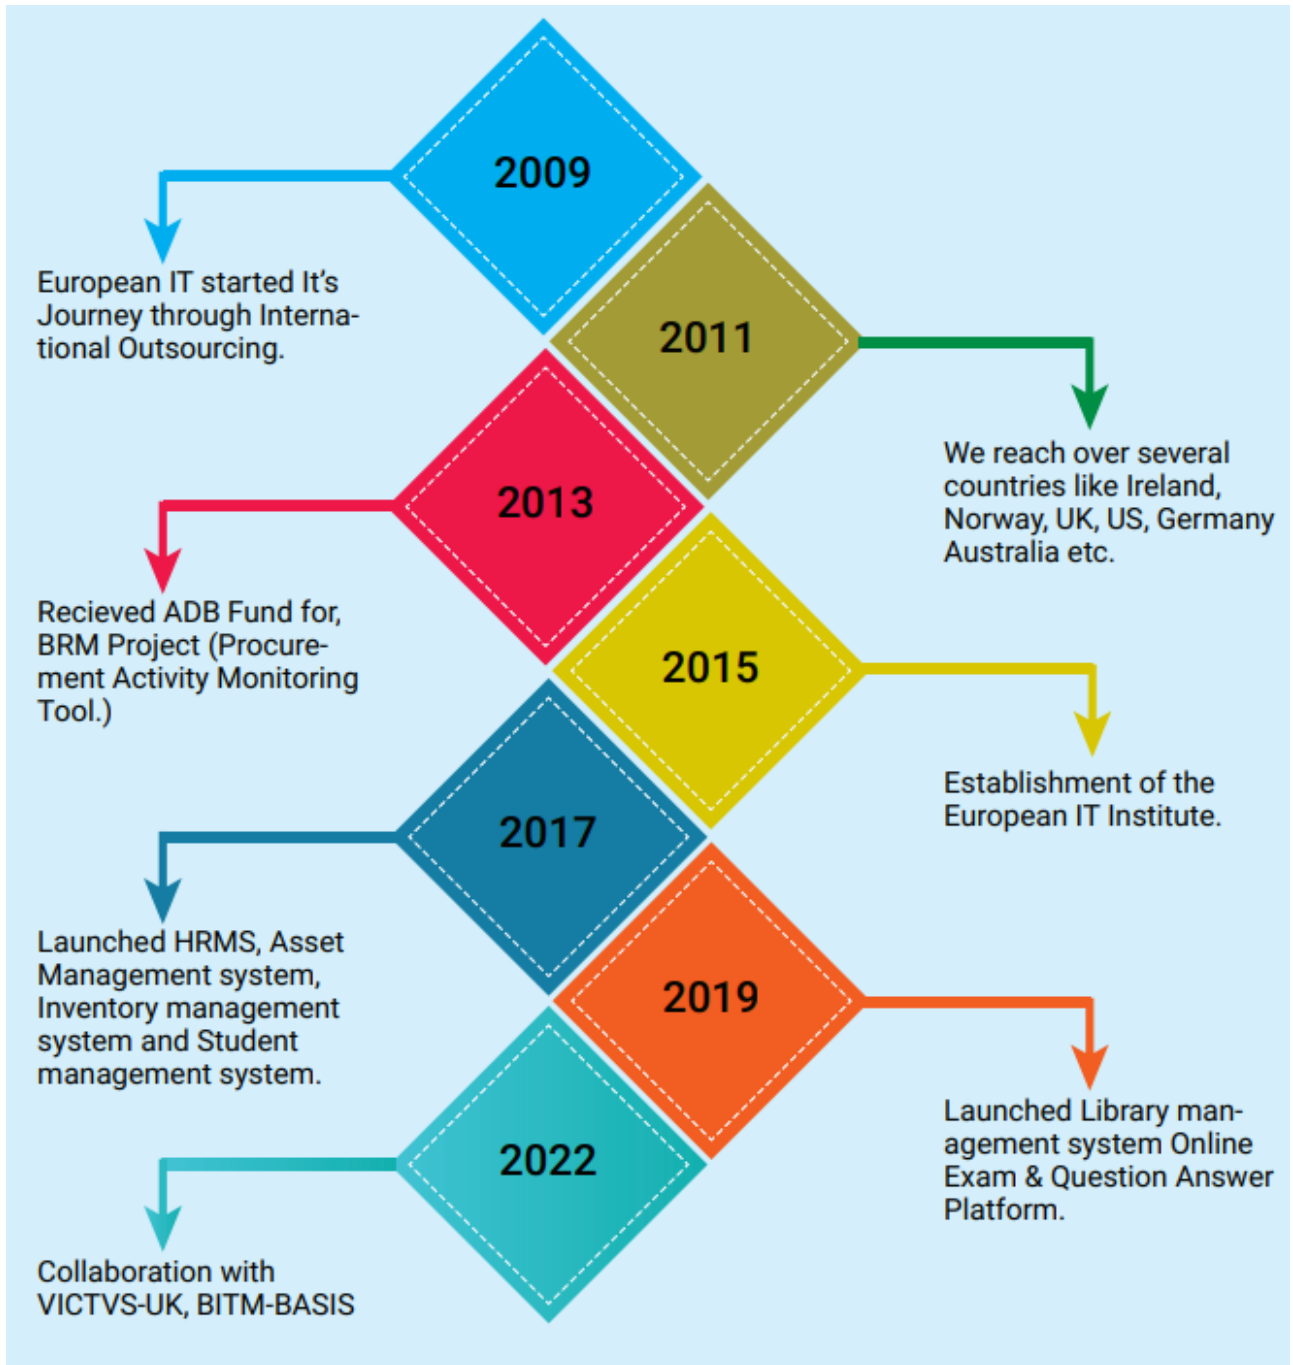

EUITSols has 15 years of experience in the IT industry. It was set up in 2009. It provides web-based solutions, services, and web design, at a minimal cost. EUITSOLs have two development centers – one in Ireland and the other in Bangladesh, taking advantage of the geographical locations and time zones. It set up a sales and marketing office in Munich, Germany, and New Delhi, India in 2011 and will soon be setting up an office in Montreal, Canada.

EUITSols also provides website domain registration and offers very competitive hosting packages.

EUITSols tries to use simple, yet elegant designs for websites. Keeping the limitations of mobile phones for web browsing in mind, they try not to use heavy embedding or develop Flash-based websites unless specifically requested by a client. Their applications are developed mainly using PHP, JavaScript, MySQL, or other open-source languages. For the products, the Oracle database can be used depending on the client's licensing capacity. The company has expanded its knowledge of the Android OS for the development of mobile applications.

European IT has delivered successful projects in multiple platforms to clients in the US, Canada, UK, Ireland, Norway, Belgium, Netherlands, Bangladesh, and Australia to name a few countries. The founders decided to set up European IT Institute in 2015 to provide professional IT training along with IT Skill Enhancement Training Program with the outsourcing market for graduates in view to gaining work that follows international standards and quality. Additionally, European IT Institute offers training delivery solutions to corporations, institutions, and individuals along with internships for graduates.

Our Journey:

2009

European IT started It's Journey through International Outsourcing.

2011

We reach over several countries like Ireland, Norway, UK, US, Germany Australia etc.

2013

Recieved ADB Fund for, BRM Project (Procurement Activity Monitoring Tool.)

2015

Establishment of the European IT Institute.

2017

Launched HRMS, Asset Management system, Inventory management system and Student management system.

2019

Launched Library management system Online Exam & Question Answer Platform.

2022

Collaboration with VICTVS-UK, BITM-BASIS

Industries and Technologies:

Euitsols is an Ireland-based company that is engaged with software solutions, Web Design, and Development, IT consulting, and System Integration. We always try to assist our clients by providing quality-based devices along with deadlines to increase business performance at all levels.
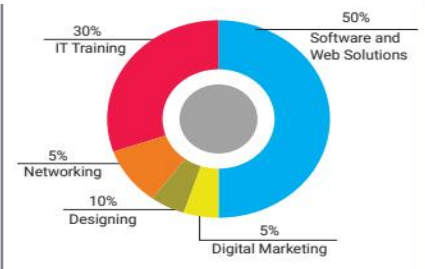

Mission:

Establish a global IT Company where clients can get extraordinary services globally and prepare job scopes by managing more clients.

Vision:

Our vision is to be one of the leading IT companies and progress our current positions in the smart market locally and Internationally. We always believe in work with accuracy and best quality to satisfy the client`s expectation. We want to be recognized as the reliable, innovative, and user friendly IT solutions provider in both local and International Market.

1500+ COMPLETE PROJECTS

13 YEARS EXPERIENCE

830+ HAPPY CLIENTS

150+ EMPLOYEES

24/7 DEDICATED SUPPORT

Employee Statistics:

Binding Our People:

Employees of Euitsols are the most treasured asset. We believe in customer satisfaction and efficacy and employee growth. Euitsols is always concerned about all of its employee's personal and professional progress. They are always encouraged to enhance their personal and professional skills for maintaining quality-based work. The seniors in the company are always encouraged to guide and share with all the subordinates. Our team members are provided their dedicated services with all the advanced technologies and environments.

We always try to provide our employees challenging yet amicable atmosphere. We encourage new talents with the best opportunities, hands-on training, advanced theoretical knowledge and, also with advanced technologies. We are glad to nurture new talents and provide them with the best way possible. Therefore, they could become an asset to a company and country.

💬 Job Placement

EUITSols is constantly creating jobs and career opportunities for people and training them to be the best in their field.

📝 Accept Modification

EUITSols welcomes modification from our clients and tries to modify them according to clients wish.

🖥 Professional IT Training

EUITSols has its own IT training center where we are constantly creating talents in various IT related sector.

Founder's Message:

Sandeep Chowdhury
Founder

" Smart society accepts unquestionable and reusable tech
nologies and we work for flawless and multi-usable technol
ogies.

FOUNDER'S
MESSAGE

"Founder of Kildare based IT Solutions Company providing website design and develop
ment of software mainly on the Java and other Open Source platforms. EUITSols has
experience and knowledge in financial and technological aspects of outsourcing and
adhering to strict quality control when providing end to end solutions to clients. Currently,
we provide website design, development, ecommerce solutions, maintenance, hosting
and domain registration of websites. We also provide software solutions for Education
Management, LC Management, Asset Management, Library Management, Online Exam
System, Inventory management, Real Estate management, accounts, HR Management.

We have expertise in a range of tools from Pitney Bowes Business Insight's Customer
Communication Management suite. We provide customised solutions for banks, tele-
communication companies and other businesses using Sagent Dataflow, DOC1, and
PCE. Managing a team of inhouse and external employees and overseeing the whole
functionality of the organization with key focus on revenue stream, customer satisfac-
tion and high quality results from employees."
.

EUROPEAN IT™

Co-Founder's Message:

Md. Mamun Ur Rasid

Co-Founder & MD

" Today's world is technology dependent, since we depend on technology, we need to be in touch with upcoming new technologies and the next upcoming industrial revolution.

CO-FOUNDER & MD

MESSAGE

"European IT was the brainchild of two IT consultants who came with over 15 years of experience in the IT industry. It was set up in 2009 when this industry appeared to be saturated, but they thought they will still give it a try by setting up their own business in providing web-based solutions, services, and web design, at a minimal cost. They have two development centers – one in Ireland and the other in Bangladesh, taking advantage of the geographical locations and time zones.

The founders decided to set up European IT Institute in 2015 to provide professional IT training along with IT Skill Enhancement Training Program with the outsourcing market for graduates in view to gain work that follows international standards and quality. Additionally, European IT Institute offers training delivery solutions to corporations, institutions, and individuals along with internship for graduates."

Experience

Providing quality IT services begins with experience and ends with dedication. European IT professionals have a few years of experience designing, developing, and testing countless software projects. It is this experience, along with our dedication to giving clients the best quality service possible, which sets European IT apart from other firms.

The European IT Training Institute is committed to providing skilled and quality professional and industrial attachment training. The European IT Training Institute has already established a reliable position by providing professional and industrial attachment training, led by a team of skilled and experienced trainers and strong management. European IT Training Institute, where there is an opportunity for professional and industrial attachment students to see and learn realistic work.

A Proven Track Record

European IT has a proven track record of providing high quality, custom project management services. Our client list includes Fortune multiple corporations, government agencies, and small businesses. Our experience is broad and spans the complete software development cycle.

Area of Expertise

As a custom IT service provider, European IT has amassed an impressive resume of projects. It's the custom nature of our development project that has enabled European IT to acquire vast experience in many diverse areas of IT and software development. Our experience, in conjunction with our quality personnel, enables European IT to be dynamic enough to tackle almost any IT development project.

European IT consultants have experience in many different aspects of the development process. Because we are a custom firm, there are no limits on what projects we can undertake. It is this ability that has enabled European IT to accumulate experience in so many diverse areas. A few of these include:

- ❖ Application Design, Development, and Testing (GUI, Database, etc.)
- ❖ Web Development (Internet/Intranet)
- ❖ Web-Enabling Applications
- ❖ Engineering, Scientific, and Data Collection
- ❖ Point-of-Sale and General Business Services Applications
- ❖ System Architecture and Implementation
- ❖ Client/Server Applications and Distributed Systems

❖ Systems Integration

❖ Platform Migrations and Code Porting

❖ Object-Oriented Design and Analysis

❖ Project Management Consulting

❖ Technical Documentation and Training

No matter what your development challenge, European IT consultants are a valuable resource.

Languages, Platforms, and Tools

Another advantage of providing custom services is that European IT consultants have gained extensive experience with a wide variety of languages, platforms, and tools during the course of our projects. In addition, European IT consultants have become experts at adjusting quickly when faced with new development environments. We are able to rapidly "come up to speed" on existing projects. The following lists just a few of the languages, platforms, and tools with which we have experience:

Web Framework
- Laravel
- Django
- ASP.net
- CodeIgniter
- Flask

Database
- Oracle
- MSSQL
- MySQL
- SQLite
- Mongo DB

Javascript
- jQuery
- React JS
- Nuxt JS
- Vue JS
- Node JS

Designing
- Illustrator
- Photoshop
- InDesign
- Adobe XD
- After Effects
- Premiere Pro

Artificial Intelligence
- Supervised Learning
- Unsupervised Learning
- Reinforcement Learning

Automation
- Scraping
- Data Annotation
- Business Intelligence

Content Management System
- WordPress
- Sanity.io

Research & Development
- IDEA Generation
- Real-life Problem Solving

Networking
- CCNA
- Linux Administrator
- MTCNA
- Cyber Security
- Cloud Computing

Digital Marketing
- SEO
- Social Media Marketing
- Email Marketing
- Analysis & Tracking
- Lead Generation
- Content Writing

Internet of things
- Arduino
- Raspberry Pi
- Google Coral Board

Processes:

- ❖ Library Characterization
- ❖ Simulation and Modeling
- ❖ Floor-planning & Timing Budgeting
- ❖ Logic Verification
- ❖ Synthesis
- ❖ Automatic Place and Route (APR)
- ❖ Layout Parasitic Extraction
- ❖ In-place Optimization and Back-annotation
    - Static/Dynamic Timing Analysis
    - Physical Verification

Available Services

European IT provides its clients with a wide range of services spanning the entire development process. Clients can utilize European IT for the entire development cycle or only for selected portions that require additional support and consultation. Our services are available on an hourly or project basis (see Rates and Billing). At European IT, we draw upon our vast experience to provide our customers with the best possible services. As a custom IT development firm, there are no limits on what projects we can undertake. However, most IT development efforts require the same basic types of services. Some of the common services available from European IT include:

System Architecture and Design

Design is often the most critical phase of any IT and software development effort. In many cases, the quality of the finished software is directly proportional to the quality of the initial design. One metaphor is particularly appropriate… Ask yourself this question: What quality of house would you get if you built it with no blueprints? Custom software development is an investment. As with any substantial investment, planning is crucial. However, there is a trade-off. It is possible to over design. This leads to lost time and money. European IT has the experience to strike the proper balance.

Development

The key to quality development is sharp people with a well thought-out plan. Good organization allows developers to modularize the development process. This results in rapid implementation of a system that can be easily tested and expanded for future versions. European IT provides a highly qualified technical staff with years of software development experience.

Project Management

European IT clients often require additional consulting and managerial support to supplement their in-house development efforts. European IT is uniquely qualified to provide this vital support. The professionals at European IT have worked on countless software development efforts, and as a result, are well-equipped to quickly anticipate and address problem areas on a given project. European IT can serve as troubleshooters or, if need be, assume management of an entire project.

IT Support and Network Administration

European IT has IT network professionals familiar with all types of heterogeneous networks. Clients have utilized our services to design, install, and manage their network systems. Some clients have even outsourced the IT support for their entire office to European IT.

Testing and Quality Assurance

With our experience in the IT and software development field, European IT can provide an extremely valuable third-party perspective, when brought in to test/QA another vendor's software. System testing is fundamental to the quality of any software. Although many developer stake shortcuts and settle for only testing their software during development (Alpha-Testing), we at European IT always encourage our clients to include a *distinct* testing phase to any project. This testing phase allows the system to be tested as a completed unit, and is usually done by someone other than the developer. In this manner, additional user feedback on the functionality and usability of the software can be integrated prior to initial release. Completion of the testing phase is accomplished through preliminary use by actual end users of the software in the real world conditions of the client's site (Beta- Testing).

Feasibility Studies

Prior to committing substantial resources to a given project, often clients want to obtain more data on the obstacles related to successfully completing the project. European IT team members have experience serving in this "recon" type role. They can quickly and efficiently identify the primary and secondary "hot spots", then prepare a Feasibility Report for the client. This report contains a ranked list of all the technical, logistical, and managerial problems associated with the proposed project. In addition, it provides preliminary estimates for cost and time.

Technical Documentation and Training Service

European IT consultants have developed numerous user manuals, reference guides, and introductory training materials to accompany our custom software over the years. This experience has provided us with the ability to quickly generate production quality documents. Rather than hiring technical writers (who are often unfamiliar with the underlying technology) to extract information from developers, many of our clients simply have European IT develop the supporting materials. European IT consultants have become so good at this in fact, that many clients have engaged European IT for the sole purpose of creating technical documentation and complete training programs.

Placement and Recruiting Services

Finding just the right person for a challenging technical staff position can be quite difficult. Standard placement services often provide overwhelming lists of "candidates," however many of the resumes provided to the client firms are seldom worth reviewing. This is because the placement firms are not technical people and therefore cannot properly filter the resumes for the hiring managers. European IT solves this problem for managers by taking a low volume, high quality approach. With our technical background, we can serve as a front-end filter for managers who don't want to spend their time reviewing every resume with "C" listed as a language.

Clients:

Project title and client	Focus / scope of tasks	
"PAMT – Procurement Activity Monitoring Tools " Bangladesh Resident Mission (BRM) – Asian Development Bank (ADB) Plot E-31, Sher-e-Bangla Nagar, Dhaka 1207, Bangladesh, GPO Box No. 2100 Office: +880 2 55667000, Fax: +880 2 9117925 to 26 Web: www.bdpamt.org	Procurement Activity Monitoring Tool (PAMT) has been developed to record dates of all procurement activities and related information contract-wise in a relational database for procurement of goods and works packages under ADB funded projects. The web-based tool also displays delay time, when applicable, and requires the users to input reason(s) for delay for further analysis to facilitate reducing delay, which is the key objective for this tool in addition to real time monitoring of procurement activities. The tool generates customized reports for users at project and portfolio level to monitor procurement activity as well as to evaluate the timeliness of each activity. The tool obtains package details automatically from existing procurement plan (in Excel format with	Delivered

	appropriate data field). It can also generate updated procurement plan in standard template prescribed by Public Procurement Rules 2008, goods-wise and works-wise. PAMT provides a common source of information for procurement monitoring for the executing/implementing agencies and ADB, and aims to facilitate achieving timely project completion.	
"PAMT - SLS : Procurement Activity Monitoring Tools – Service Level Standard " Bangladesh Resident Mission (BRM) – Asian Development Bank (ADB) Plot E-31, Sher-e-Bangla Nagar, Dhaka 1207, Bangladesh, GPO Box No. 2100 Office: +880 2 55667000, Fax: +880 2 9117925 to 26 Web: www.pasld.bdpamt.org	In 2015 Asian Development Bank (ADB) instituted service standards benchmark for procurement related activities for loan and grant funded procurement. These standards are set from the approval process of bidding documents to the stage of contract signing. Generally three parties are involved in the total procurement process - executing agencies (EA) or implementing agencies (IA) of the government, ADB (in prior review contracts) and bidders. In light of these standards, ADB would like to measure the performance of all activities carried out by the relevant stakeholder. This statistics would help them design the future benchmark for all procurement activities from time to time and thus ultimately close the project by the planning deadline.	Delivered

	Under the above aim, Bangladesh Resident Mission (BRM) engaged a procurement consultant to develop a web based monitoring tool to measure the time required for each party involved in the procurement process and to compare it with the standards set by ADB. The system is designed to cater the portfolio of BRM. However, it is mostly focused on measuring performance of ADB staff in reviewing procurement documents for prior review contracts and high value contracts.	
"Inventory & Accounts" Techpro Tele Engineering Ring Tower, Flat B-2, 32-35 Probal Housing, Ring Road, Adabar, Mohammadpur, Dhaka-1207 Office: +880 1622 11 00 44, Web: www.techprobd.com	The Techpro Tele Engineering is handling product buy & sell with accounts.	Delivered

Banking HRMS	HRMS incorporate maximum HR operations of a bank that was developed based on operation of a leading bank IFIC Bank Ltd. It comprises of e-recruitment, employee management, bonus, payroll, attendance (integrated with fingerprint + RF ID), provident fund, Increment, insurance, leave, transfer, promotion, tax, training, loan management.	At Development Phase
Fixed Asset Management	Fixed assets management is an accounting process that seeks to track fixed assets for the purposes of financial accounting, preventive maintenance, and theft deterrence. Organizations face a significant challenge to track the location, quantity, condition, maintenance and depreciation status of their fixed assets.	At Development Phase
