2026 EDITION

Healthcare Operations • Artificial Intelligence • Compliance • Connected Systems

BANGLADESH OPERATIONS & GLOBAL HEALTHCARE TECHNOLOGY

Connecting Patients, Providers, and Payers through intelligent healthcare technology and operational excellence.

Company at a Glance

Company	THSnet Ltd.
Bangladesh Operation	House 23 (2nd Floor), Road 121, Gulshan 01, Dhaka, Bangladesh
Bangladesh Registration	08 October 2025 RJSC Incorporation No. C-205241/2025
Trade License	TRAD/DNCC/021744/2025
Global Foundation	Established April 2006
Primary Focus	Healthcare operations, healthcare technology, AI, software development, compliance, and technology-enabled services
Bangladesh Hub	Technology development, AI/software engineering, healthcare operations, administrative support, product development, global service delivery, research and innovation

1. Company Overview

THSnet Ltd. is a healthcare consulting and technology company focused on improving the operational, financial, compliance, and clinical performance of independent physician practices and healthcare organizations.

Established in April 2006, THSnet has supported healthcare organizations through healthcare consulting, practice management, revenue-cycle guidance, compliance support, technology consulting, and operational improvement services.

Since 2025, THSnet has accelerated the development of an integrated healthcare technology ecosystem combining healthcare operational experience with proprietary software, artificial intelligence, secure IT, workflow automation, and technology-enabled services.

2. Mission & Vision

Mission: To empower physicians and healthcare practices with intelligent, dependable, and compassionate operational support so they can focus on delivering high-quality patient care.

Vision: To build a unified healthcare ecosystem powered by compliant AI, ethical technology, and human-centered design, transforming how medical practices run, documentation is created, compliance is managed, and revenue cycles flow.

3. Bangladesh Operations

THSnet Ltd. set up its operational office in Dhaka, Bangladesh as an important center for technology development, healthcare operations, administrative support, product development, and organizational growth.

The Dhaka operation supports:

- Healthcare technology development
- AI and software engineering
- Healthcare operations
- Administrative support
- Product development
- Global service delivery
- Technology research and innovation

The Bangladesh operation complements THSnet's established healthcare consulting and operational experience and forms an important part of the company's global healthcare technology and operations activities.

4. Healthcare Operations & Technology-Enabled Services

THSnet provides end-to-end healthcare operational and technology services designed to reduce administrative overhead, improve practice performance, and prepare healthcare organizations for AI-driven healthcare.

Core service areas include:

- Patient scheduling, referral coordination, follow-up, reminders, and patient engagement support
- Provider credentialing and payer enrollment

- Practice setup, business planning, operational planning, and workflow design
- Prior authorization, documentation coordination, payer communication, VNA coordination, and care transitions
- Revenue cycle management, including eligibility, insurance verification, billing, coding support, claims, denials, accounts receivable, and payment follow-up
- Secure healthcare IT, cloud infrastructure, EHR technology support, network support, and security-focused infrastructure
- Healthcare consulting, MSO support, revenue-cycle consulting, compliance advisory, technology consulting, AI/software development, and workflow optimization.

5. Artificial Intelligence & Healthcare Technology

THSnet is developing an integrated model in which healthcare consulting, healthcare operations, artificial intelligence, and proprietary software work together.

The technology strategy focuses on:

- Artificial intelligence and large language models
- Agentic AI
- Intelligent automation
- Clinical documentation
- Coding intelligence
- Compliance workflows
- Healthcare data
- Workflow optimization
- Secure healthcare infrastructure

THSnet's approach is based on responsible AI: technology should reduce administrative workload while improving documentation quality, compliance, and operational performance.

6. Proprietary Technology Portfolio

- **MEATrix™** -THSnet's flagship, patent-pending healthcare ecosystem designed to unify healthcare operations, documentation, compliance, revenue integrity, and intelligent automation.
- **MEATscribe.ai™** -A healthcare-native AI platform under development to aid clinicians and coding professionals with compliant clinical documentation and related healthcare workflows.
- **MEATrix Connect™** -A HIPAA-compliant healthcare communication and collaboration platform designed to ease secure communication among healthcare professionals and care teams.
- **CoderJam.net™** -A healthcare education and professional community platform focused on medical coding, compliance, revenue cycle, and related healthcare professions.

7. Compliance, Security & Human Oversight

THSnet's technology philosophy is built around Compliance + Security + Accuracy + Human Oversight.

The development approach emphasizes HIPAA-aware architecture, secure healthcare technology, documentation traceability, compliance-oriented workflows, payer-rule validation, audit readiness, controlled access, data security, and responsible AI development.

THSnet does not view artificial intelligence as a replacement for healthcare professionals. The company believes in Human + AI collaboration, with AI supporting data organization, documentation, information extraction, workflow routing, repetitive administrative processes, coding support, compliance checks, and knowledge retrieval while healthcare professionals keep judgment, clinical context, oversight, communication, and compassionate patient care.

8. Competitive Advantage

THSnet's competitive advantage comes from combining disciplines that are traditionally separated:

Healthcare Operations • Consulting • Revenue Cycle • Compliance • AI • Software • Healthcare IT • Workflow Optimization

This integrated approach allows THSnet to understand healthcare problems from both operational and technology perspectives. Rather than developing technology in isolation, THSnet's products are informed by real healthcare workflows and operational requirements.

9. Who We Serve

THSnet's solutions are designed to support:

- Independent physicians and medical practices
- Healthcare organizations and operations teams
- Revenue-cycle teams
- Medical coders and compliance professionals
- Care-management teams
- Healthcare technology teams
- Payers and healthcare partners

The long-term goal is to make sophisticated healthcare intelligence and workflow technology accessible across organizations of varied sizes.

10. Product Development & Growth

THSnet follows a phased, outcome-driven product development strategy focused on product integrity, regulatory awareness, real-world validation, and long-term scalability.

Current and planned development areas include MEATrix™ MVP deployment, structured MEAT note generation, embedded coding and compliance logic, provider and coder feedback, operational feedback loops, accuracy and usability refinement, multi-specialty workflows, audit-readiness tools, documentation traceability, analytics, quality metrics, scalable practice onboarding, enterprise security, governance, access controls, EHR integration readiness, RCM integration, data standards, and strategic partnerships.

11. Strategic Priorities 2026

- a. Healthcare AI -Develop responsible AI solutions specifically designed for healthcare workflows.

- b. MEATrix™ Ecosystem -Validate and expand the MEATrix™ platform as the company's flagship healthcare technology ecosystem.
- c. Operational Excellence -Continue providing healthcare organizations with high-quality operational and consulting support.
- d. Compliance & Security -Build healthcare technology with security, compliance, auditability, and responsible AI principles.
- e. Scalable Healthcare Infrastructure -Develop technology capable of supporting practices and healthcare organizations as they grow.

12. Long-Term Vision

THSnet's long-term ambition is to become a trusted healthcare technology ecosystem connecting:

Patients → Providers → Payers → Data → AI → Operations → Revenue

The company believes the future of healthcare requires technology that is intelligent, secure, compliant, transparent, explainable, and human-centered.

Through THSnet, MEATrix™, MEATscribe.ai™, MEATrix Connect™, CoderJam.net™ and its broader healthcare technology portfolio, the company is building toward a more connected and intelligent healthcare ecosystem.

13. Bangladesh Corporate Information

Company Name	THSnet Ltd.
Legal Status	Company incorporated and registered in Bangladesh under the Registrar of Joint Stock Companies and Firms (RJSC)
Operational Location	House 23 (2nd Floor), Road 121, Gulshan 01, Dhaka, Bangladesh
Date of Incorporation / Registration	08 October 2025
RJSC Incorporation Number	C-205241/2025
Trade License Number	TRAD/DNCC/021744/2025

14. THSnet Difference & Promise

Our philosophy is simple: Don't just digitize healthcare problems. Understand them, redesign the workflow, and then apply intelligent technology.

Our promise is to help healthcare organizations:

- Operate better.
- Document better.
- Communicate better.
- Comply better.
- Get paid better.
- Care better.
