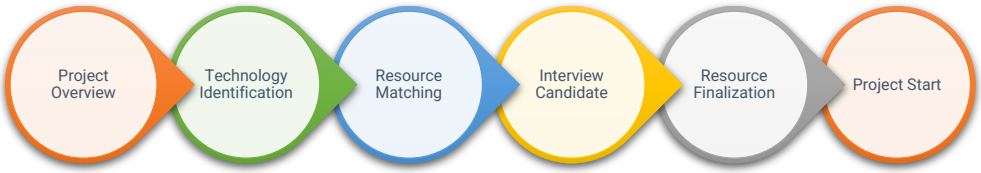
CUSTOMER ENGAGEMENT MODELS

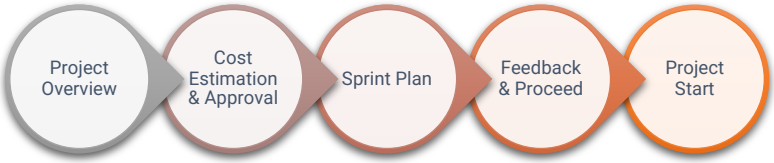
Monthly Engagement / Resource Augmentation / Time & Material Model

In this model, one or more resources dedicatedly work for the customer as team members for that particular company as per assignment.



FRAMEWORK MODEL

In this model, multiple resources might get engaged for a particular project or assignment and according to the delivery charges will be there.



SOFTWARE DEVELOPMENT METHODOLOGY

We are followed most popular software development methodology Agile Scrum methodology by Trello and JIRA for resource planning & management. We also used GIT as software source code repository for our software source code, so that we can use previous source code in future if any modification is required of existing software and new software developer can use same source code if original software developer leave our company who is developed this solution.
